Chapter 1 FORGING A NEW BANKING LANDSCAPE

TOP-DOWN VIEW, ASIA
 FOCUS, REGULATION

- 8 ENGINES FOR ECONOMIC GROWTH**
 Banks are not 'socially useless', as the chairman of the UK regulator recently said, but the onus is on them to prove their worth as engines of economic stabilisation and growth
John Varley, chief executive, Barclays

- 12 ALL EYES ON ASIA**
 As the balance of world economic power shifts slowly but surely to the high-growth markets of Asia, the financial centres of Asia will compete even more with New York, Frankfurt and London
Peter Sands, chief executive, Standard Chartered Bank

- 16 LESSONS FROM THE 'LUCKY COUNTRY'**
 Bucking global trends for advanced nations, Australia achieved economic growth in each quarter of 2009, thanks to a robust banking system, which has been overseen by the Australian Prudential Regulation Authority since 1998
John F Laker, chairman, APRA

Chapter 2 RISK MANAGEMENT

THE RISK MANAGER, SINGLE
 VIEW, DATA FOCUS

- 20 RISK: THE WAY AHEAD**
 Managing risk poorly was at the root of the financial crisis. An ability to measure, manage and mitigate risk well will be the key strategic advantage for the successful financial services firm in the future
Alan Smith, global head of risk strategy, group risk, HSBC

- 24 TAKING A SINGLE VIEW OF RISK**
 A better understanding of both quantitative and qualitative risk will be essential if the financial sector is to avoid a repeat of the financial crisis. All risk should be treated as one
Pauline Bird, senior manager for business restructuring technical and risk management, BDO Stoy Hayward

- 26 GETTING TO GRIPS WITH A RISKY BUSINESS**
 The cliché 'garbage in, garbage out' is well known in the risk business, but beyond data quality, the breadth and diversity of data also needs to be considered
Lawrence Dunn, head of risk management business for EMEA, RiskMetrics Group

- 28 RISK MANAGEMENT: STANDING UP TO SELF-INTEREST**
Sponsored by SAS
 Understanding and assessing risk correctly is fundamental to the financial services industry. The failure to do so has been highlighted by the crisis and banks need to prioritise customers' needs to ensure their future success
Benny Higgins, CEO, Tesco Bank

- 30 REASSESSING RISK INFRASTRUCTURE**
Sponsored by Murex
 The role of risk within a bank has dramatically changed since the start of the crisis. Banks need to concentrate on improving processes and systems to establish an effective risk management framework
Maroun Edde, CEO, Murex

Chapter 3 DEALING WITH NEW REGULATIONS

NEW RULES, BOOM AND BUST,
 FUTURE LEADERS, FOREIGN
 EXCHANGE

- 34 REWRITING THE RULES**
 Banking regulation needs a fundamental overhaul. However, risk, not size, needs to underpin the shape of the new regulatory framework
Robert P Kelly, chairman and CEO, BNY Mellon

- 36 SIX WAYS TO AVOID BOOM AND BUST**
 Mapping out six ways to reform Europe's financial architecture in a bid to avoid another boom-bust cycle
Franz Nauschnigg, head of European affairs and international financial organisations division, Central Bank of Austria

- 40 SURVIVAL OF THE FITTEST: IDENTIFYING THE FUTURE LEADERS OF FINANCE**
 Reshaping the regulatory framework in which European banks operate will be a long and complex business, but may bring opportunities for some
Dr Nikolaos Georgikopoulos, research fellow, Centre for Planning and Economic Research

- 42 IF IT AIN'T BROKE, DON'T FIX IT**
 New rules that will create central counterparty clearing for derivatives were inspired by a desire to increase transparency and avoid excessive speculation, but regulators should beware of a one-size-fits-all policy. This is a key concern for the foreign exchange market
Kevin Rodgers, global head of foreign exchange options, Deutsche Bank

What does the future hold for international banking?

As the dust begins to settle after the worst financial crisis in living memory, it is time for the banking sector to start rebuilding again. But what form will this post-crisis 'brave new world' take? *The Banker's* second edition of *How to Run a Bank* has taken contributions from some of the world's leading industry figures. Bankers, regulators, academics and economists have all contributed to a universal guide on how to run a bank in this entirely altered financial and regulatory landscape.

John Varley, chief executive of Barclays, says that contrary to some schools of thought, banks are not 'socially useless', but the burden of proof is on them to establish that they are 'socially useful' by being engines of economic stabilisation and growth.

Chief executive of Standard Chartered Bank, Peter Sands, writes that the biggest beneficiaries of the crisis will be in Asia, with Asian capitals poised to take on the established international financial centres of Frankfurt, London and New York in the years to come.

Risk management lay at the heart of the crisis. With this in mind, HSBC's global head of risk strategy, group risk, Alan Smith, gives a blow-by-blow guide on how to avoid the errors of the past, while other senior risk specialists map out how risk managers need to change their ways.

On the regulatory front, John Laker, the chairman of the Australian Prudential and Regulatory Authority, explains how Australia managed to avoid some of the pitfalls that other developed countries fell into. Robert Kelly, chief executive of BNY

Mellon, writes that banking regulation needs a major overhaul and that risk, rather than size, needs to underpin the shape of any new regulatory framework.

How to Run a Bank will also tackle the thorny issues of bankers' bonuses, while publishing a contribution from Marcello Bianchi, the chairman of the Organisation for Economic Co-operation and Development's steering group on corporate governance, on forging a new governance framework. For some people, such as Andrew Hilton, a former World Bank economist and director of the Centre for the Study of Financial Innovation, nothing profound appears to have changed as a result of the past 18 months and the world has wasted a good crisis.

With almost 40 contributions from specialists across the banking and finance spectrum, *The Banker's* 136-page guide on how to run a bank in 2010 aims to tackle every aspect of international banking, in time for a new decade. How will the securitisation market cope with a raft of new regulation and what will this mean for the industry? How will banks rebuild their shattered reputation in the public's eyes and what is the future for corporate and retail banks in the face of stiff new non-bank competition?

The book concludes with an article by *The Banker's* editor, Brian Caplen, on what kinds of strategies banks will need to adopt in the future in order to succeed in an entirely altered financial and regulatory landscape. *The Banker* has attempted to leave no stone unturned in search of the best way to run a bank at this watershed time for the industry.

Chapter 4 CORPORATE GOVERNANCE ISSUES

GOVERNANCE, PAY, BONUSES,
BOARDS

46 BUILDING A NEW GOVERNANCE STRUCTURE FOR A STABLE FUTURE

The OECD is well-placed to map out a new framework for corporate governance to avoid a repeat of the financial crisis

Marcello Bianchi, chairman of the OECD steering group on corporate governance, and **Mats Isaksson**, head of corporate affairs division, OECD

48 BANKERS' PAY: A NEW REGULATORY FRAMEWORK

Whether we like it or not, substantial change to remuneration structure and governance to address excess pay is on its way

Jon Terry, reward partner and **Tim Wright**, reward director, PricewaterhouseCoopers

50 BANKERS' BONUSES: A DEFENCE

The debate about bonuses has got to return to a sensible discussion about how to maximise performance and minimise risk

Chris Roebuck, human resources consultant

52 BUILDING A NEW BOARD

Bad bank governance and extreme leverage may have compounded the recent economic crisis, yet the system of intervention must be reassessed

Luigi Zingales, **Robert C McCormack** professor of entrepreneurship and finance, Booth School of Business, University of Chicago

Chapter 5 TRENDS IN CORPORATE & RETAIL BANKING

NEW BRANDS, REVENUE
MODELS, MID-TIER BANKS

56 WILL NEW BRANDS MAKE THEIR MARK IN RETAIL BANKING?

The changes in high street banking have created a once-in-a-lifetime opportunity for existing retailers and overseas operators to establish themselves as the 'new banks'

Colin Kersley, CEO, M&S Money

58 PROFITS UNDER PRESSURE: THE WAY FORWARD FOR BANKS

Banks will either need to consolidate further or re-shape their revenues to align price with the cost to service, and to move from a product industry to a service industry

Julian Skan, senior executive, Accenture

62 LONG LIVE THE MID-TIER BANKING REVOLUTION

For the boldest mid-tier banks, 2010 might turn out to be a seminal year. As with all rare events, this crisis has provided rare opportunities and regional or super-regional players could reap big benefits

Joel Mandelbaum, chief executive, Wall Street Systems

Chapter 6 TECHNOLOGY

DATA USE, STAYING AHEAD

66 DATA: THE SILENT VOICE OF THE CUSTOMER

Data surrounding customer behaviour is valuable to banks' relationships with their clients and their risk management strategies

Alastair Sim, senior director of global marketing, SAS

68 HARNESSING NEW TECHNOLOGY TO STAY AHEAD

Linking technology flows allows firms to assess their relative exposures. New techniques are providing financial institutions the ability to model real-time data as they strive to meet new regulatory requirements

Jim Goodnight, CEO, SAS

Chapter 7 RESTRUCTU- RING THE BALANCE SHEET

Chapter sponsored by SAS

SECURITISATION, STANDARDS,
RISK FRAMEWORK, LIQUIDITY

72 SECURITISATION: A DEFENCE

Highly influential people are asking whether securitisation is the far superior alternative to a conventional banking system. One way to find an answer is to consider a world where banks replace securitisation

Ralph Daloisio, chairman of the board, American Securitization Forum

74 SECURING STANDARDS FOR FUTURE STABILITY

A number of industry-led and regulatory initiatives may be able to salvage the securitisation industry's reputation and create the confidence to help recovery and boost EU economic growth

Rick Watson, managing director, Association for Financial Markets in Europe, European Securitisation Forum

76 CALL FOR A POST- CRISIS RISK ANALYSIS FRAMEWORK

The credit crunch showed asset and liability management is in need of fine-tuning, having proven inefficient even in cases where managed by a single committee or representative

Steve Husk, CEO, FRSGlobal

78 LIQUIDITY... YOU ALWAYS HAVE ENOUGH UNTIL YOU NEED IT

A deeper understanding of the vagaries of risk will help to ensure we do not endure another credit crunch

David Vander, co-founder, Liquidatum

Chapter 8 HOW TO RUN AN ISLAMIC BANK

INNOVATION, FUTURE
CHALLENGES

82 ISLAMIC FINANCE: THE AGE OF INNOVATION

The Islamic market is expanding rapidly, but to become a global force, it needs to create a range of innovative, flexible products that emphasise its ethical focus

Stephen Timewell, editor emeritus, The Banker

86 THE ROAD AHEAD

Although Islamic banking is developing rapidly, there are challenges it must tackle if it is to continue successful expansion within the wider financial system

Dr Fouad Matraji, general manager, Arab Finance House, Beirut

Chapter 9 THE FUTURE OF SECURITIES

MARKET STRUCTURE,
INTERNATIONAL FINANCIAL
CENTRES

- 90 THE DEMOCRATISATION OF SPECULATION**
Market structure, once driven by the banks as the major members of the monopoly exchanges, is now driven by proprietary trading firms acting for themselves
Richard Balarkas, CEO, Instinet Europe
- 92 OBSTACLES AND OPPORTUNITIES FOR INTERNATIONAL FINANCIAL CENTRES**
As the dust begins to settle after the financial crisis, international financial centres will have to adapt to survive in a new and tougher economic and regulatory environment
Alex Shapland, partner for regulatory and IFC practice, and Nicholas Dutton, senior manager for regulatory and IFC practice, PricewaterhouseCoopers

Chapter 10 THE FUTURE OF PAYMENTS

PAYMENTS, SEPA, NEW ROLES,
REMITTANCES

- 96 COLLABORATE TO SUCCEED**
A collaborative approach within transaction services organisations and with other market players will enable the industry to steer away from commoditisation
Francesco Vanni d'Archirafi, head of global transaction services, Citi
- 98 THE PRICE OF HARMONISED PAYMENTS**
After a painfully slow start, the uptake of SEPA credit transfers in Europe is beginning to increase, though many challenges remain before the dream of a harmonised European payments area becomes a reality
Tony Richter, head of business development, payments and cash management, Europe, HSBC
- 100 MOVING INTO THE LIGHT**
Suffering from years in the shadows of its more profitable corporate and investment banking cousins, the credit crisis was the catalyst needed to re-assess the relevance of transaction banking
Francesco Burelli, director of the payments team, Deloitte LLP
- 102 MONEY ON THE MOVE**
Remittance volumes have held up well in the face of a global downturn, but traditional players are facing increased competition as better technology and new regulation opens the way for more varied distribution channels
Charlie Corbett, commissioning editor, How to Run a Bank 2010

Chapter 11 BANKING AND THE ENVIRONMENT

GREEN THINKING, SOCIAL
RESPONSIBILITY

- 108 SUSTAINABLE THINKING**
Understanding the importance of sustainable banking will be critical both in helping to protect the environment, and in maintaining healthy bank profits
Jianping Gao, chairman, Industrial Bank China
- 110 MAINSTREAMING SUSTAINABILITY**
As more business opportunities for banks emerge through social responsibility programmes, the theme of sustainability is becoming a key factor of competitive differentiation between financial service providers
Abyd Karmali, global head of carbon markets, and Matt Hale, head of sustainable banking, EMEA, Bank of America Merrill Lynch

Chapter 12 FRONTIER MARKETS

UNBANKED, FRONTIER
BUY-OUTS

- 114 REACHING OUT TO THE UNBANKED**
Mobile banking could be the answer to transforming the lives of countless millions of ordinary Africans, but there are huge challenges ahead before the dream becomes a reality
Dave Van Niekerk, CEO, Blue Financial Services Limited
- 118 HOW TO BUY A BANK IN AN EMERGING MARKET**
Buying a bank in an emerging or frontier market is a course strewn with potholes. However, investors that take due care and attention will in many cases catch a bargain with strong growth opportunities
Mark Richards, partner, Actis

Chapter 13 REPUTATION AND BRANDING

REPUTATION, BRAND

- 122 BANKING: A CONFIDENCE TRICK?**
At a time when consumer trust in banks is arguably at an all-time low, a focused and strategically integrated consumer communications programme could be one of the most vital priorities for a bank, whether it is financially challenged or healthy
Geoffrey Pelham-Lane, UK CEO, Financial Dynamics
- 124 BANKERS: FROM HEROES TO ZEROES**
Rebuilding damaged reputations will be a critical concern for banks across the developed markets, but trying to restore trust in a disillusioned customer base will take time
David Haigh, CEO, Brand Finance

Chapter 14 LOOKING AHEAD

POST-CRISIS LIFE, FUTURE
OPPORTUNITIES, FINAL
AGENDA

- 130 ARE WE WASTING A GOOD CRISIS?**
The international debate on the structure of post-crisis financial regulation will take many courses, but it seems many already feel that a good crisis has been wasted
Andrew Hilton, director, Centre for the Study of Financial Innovation
- 134 REBUILDING BANKING**
The post-crisis world will be a very different place as regulation is overhauled, mergers and acquisitions pick up pace and emerging markets and new technologies are explored
Brian Caplen, editor, The Banker
- 136 THE FINAL AGENDA**
A number of invaluable lessons can be learned from the recent financial crisis, which will go a long way to strengthening the banking industry for the future
Charlie Corbett, commissioning editor, How to Run a Bank 2010

Six ways to avoid boom and bust

Franz Nauschnigg
Head of
European Affairs
Central Bank
of Austria

THE HEAD OF EUROPEAN AFFAIRS
AT THE CENTRAL BANK OF AUSTRIA
MAPS OUT SIX WAYS TO REFORM
EUROPE'S FINANCIAL ARCHITECTURE
IN A BID TO AVOID ANOTHER
BOOM-BUST CYCLE

The current crisis is the worst global financial and economic crisis since the Great Depression of the 1930s. As a consequence of the Great Depression, the Bretton Woods System was established in 1944. The financial system was strongly regulated, and a strong role was assigned to the state (fixed exchange rates, capital controls and demand management). It was quite successful, bringing strong growth, low unemployment and inflation. There were few financial crises until its breakdown in 1971.

This was followed by a worldwide trend of deregulation (especially of the financial sector) and privatisation under the monetarist and neo-liberal paradigm. The failure of the state and the alleged greater efficiency of market solutions were stressed. The insight of John Maynard Keynes, that the Great Depression ►

had its roots in the imperfections of the monetary-financial system, was forgotten. Financial crises became more common. The IMF has counted 124 banking, 208 currency and 63 country debt crises in the period from 1970 to 2007.

A deregulated financial system has a pro-cyclical tendency, which leads to overshooting and creates boom/bust cycles, and usually also massive overshooting of capital flows. Monetary policy is undermined by carry trades and foreign currency loans, which increase vulnerability. Despite widespread market failure, market elements were incorporated into banking regulation (Basel II) and accounting rules (mark-to-market), providing for strong pro-cyclical effects. The pro-cyclical tendency of the financial sector became stronger, with more overshooting and stronger boom/bust cycles. The pro-cyclicality of Basel II and the international accounting rules must be corrected to make the financial system less pro-cyclical. The remaining pro-cyclicality of the financial system must be compensated by policy action.

the IMF has counted 124 banking, 208 currency, and 63 country debt crises from 1970 to 2007

Bubble contagion

In Europe, financial deregulation and liberalisation triggered lending booms, speculative bubbles in the deregulated financial markets and boom/bust cycles. Finland, Norway and Sweden experienced severe systemic crises in the early 1990s. More regulated European Free Trade Association (EFTA) countries such as Austria and Iceland, however did not experience a crisis at that time. After extensive liberalisation, Iceland experienced a boom/bust cycle with a severe financial crisis in 2008.

Boom/bust cycles developed also in the central eastern and south-east Europe (CESEE) region. The crisis in Iceland led to contagion in Hungary in autumn 2008. In early 2009, contagion also affected CESEE countries with strong fundamentals, when their currencies came under pressure. Euro area banks and countries with large exposures to the CESEE region also suffered.

In this crisis, monetary, fiscal and financial policies have played a central

role in cutting the adverse feedback loops between the financial and the real sector. International co-operation – in particular the EU, G-20 and IMF – has been central to providing financial support to financial systems, banks and states. The CESEE region, and countries and banks with large exposures to this region such as Austria, have benefited from this concerted action. Countries outside the euro area are vulnerable to currency crises, whereas the euro acts as a protective shield for eurozone countries.

Strengthening the system

There are a number of measures that would strengthen the European financial architecture and deepen European integration:

1 In a boom, a credit growth stabilisation tax (CGST) on all new private sector credit should be introduced to limit credit growth. The receipts would flow into a cyclical stabilisation fund (CSF) to be used in downturns.

2 For the euro area member states, the creation of a €200bn counter-

Key ideas

Crisis management

- **The pro-cyclicality** of Basel II and the international accounting rules must be corrected to make the financial system less pro-cyclical.
- **The remaining** pro-cyclicality of the financial system must be compensated by policy action.
- **In this crisis** monetary, fiscal and financial policies have played a central role in cutting the adverse feedback loops between the financial and the real sector.
- **International co-operation** – in particular EU, G-20, and IMF – has been central to providing financial support to financial systems, banks and states.

the remaining pro-cyclicality of the financial system must be compensated by policy action

cyclical financing facility, based on Article 122 of the EU Treaty. It should have incentives to bring the structural deficit under control.

3 For non-euro area EU member states, the creation of a €50bn counter-cyclical financing facility, in addition to the existing EU balance of payments assistance facility.

4 For the European Economic Area, EU candidates, EFTA and EU neighbouring countries, the creation of a €50bn EU combined balance of payments and macro financial assistance facility.

5 The bonds issued and backed by the EU would create an EU bond market.

The benefits of this would be high, allowing the EU to better compete for international investors.

6 The establishment of bilateral swap or repo facilities between the Eurosystem and EU as well as other European central banks. For comparison, the Federal Reserve has concluded swap agreements worldwide.

The measures would help to achieve the needed strengthening of the automatic fiscal stabilisers in Europe, which have been weakened with the welfare state.

The stabilisation of expectations of economic agents against both external and cyclical shocks would be supported. They would help stabilise financial markets, stimulate our economies, correct market failure and deepen European integration with no cost for the EU taxpayer.

Substantial welfare gains for the eurozone, the EU and other countries in 'extended Europe' could be achieved.

biography

Franz Nauschnigg is head of the European affairs and international financial organisations division at the Central Bank of Austria.
